

create and upload content and resources of their choosing. As a result, it is not possible to guarantee that all hosted content is fully accessible. This statement has been written with that in mind.

This accessibility statement applies to the Learning Platform [Moodle](#). You can learn more about accessibility support for Microsoft Teams [here](#). We have also introduced [voice](#)

x navigate most of the VLE

using just a keyboard

x listen to most of the content of a page using a screenreader. Moodle maintains a list of compatible screenreaders.

[AbilityNet](#) has advice on making your device easier to use if

Compliance status

Moodle as a platform is designed to be accessible with full WCAG 2.1 AA compliance. This website is partially compliant with the [Web Content Accessibility Guidelines version 2.1](#) AA standard, due to the reasons and exemption listed below:

Whilst we are able to ensure Moodle is an accessible platform, the customisability and ability to upload content means it may be customised or host content that is not accessible. The exemption is that it is a disproportionate burden to make fully accessible.
